KorTerra®

Damage Prevention Software
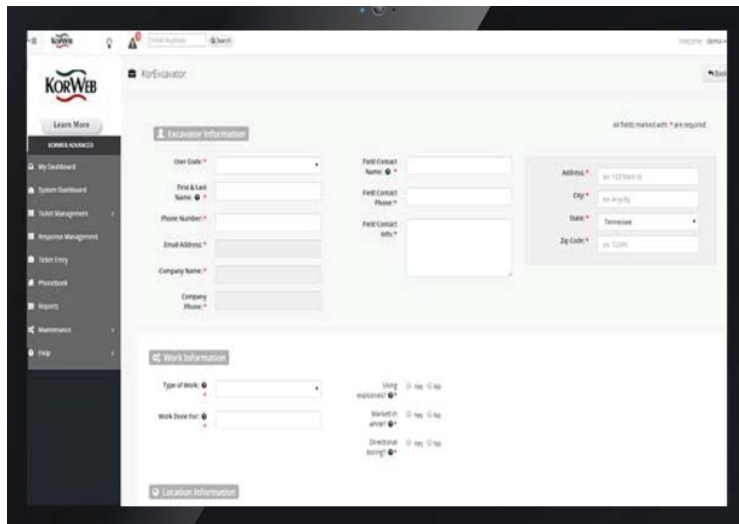

Trusted. Supported. Innovative.

KorExcavator

KorExcavator Workforce Management is a web-based tool for excavation companies that provides robust project management tools including scheduling, documentation, ticket submission/compliance, reporting, and analysis.

KorExcavator provides searching and reporting features that help both excavation crews and management keep track of daily activity, as well as planning for the future. In addition, KorExcavator helps enhance operational efficiency and empowers informed decision making by providing the data and search tools to engage in business intelligence. All data is stored in one central database, making searching for supporting documentation a simple process.

Improve pre-planning, excavation and post-work activities by maintaining constant visibility of your overall operations with KorExcavator.
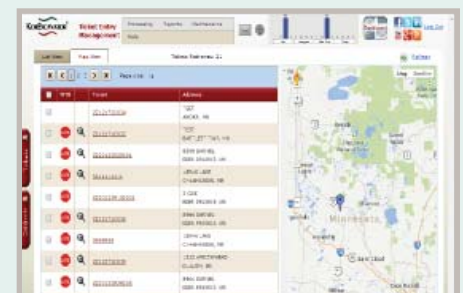

Features

- Project scheduling
- Document control
- Ticket scheduling, submission, matching, and compliance
